

Wiki Extensions - Defect #1295

Wiki Extensions vote macro problems

11/26/2013 11:31 PM - Miodrag Milic

Status: <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> New <input type="checkbox"/>	Start date: 11/26/2013
Priority: <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Normal <input type="checkbox"/>	Due date:
Assignee: Haru lida	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: 0.6.5	Spent time: 0.00 hour
Description	
There are some problems with this macro which makes it unreliable or unusable depending on context:	
<ul style="list-style-type: none">• One person can vote multiple times if he logs out then logs in• There is no way to unvote if you accidentally clicked unwanted option. Clicking option again (perhaps after short period of time only) should switch vote direction.• There are no mutually exclusive options: you can always vote for everything even if that doesn't make sense (for instance in <code>{{vote(yes)}} {{vote(no)}}</code> you can vote for both yes and no)	

History

#1 - 11/26/2013 11:36 PM - Miodrag Milic

For mutually exclusive vote one syntax could for instance be

```
{{vote(vote1:yes)}} {{vote(vote1:no)}}
{{vote(vote2:yes)}} {{vote(vote2:no)}} {{vote(vote2:dont-know)}}
```

vote1/2 is required only to specify those options are connected and voting for one should prevent a vote for another one.

#2 - 11/27/2013 08:50 AM - Haru lida

- Project changed from *r-labs* to *Wiki Extensions*

- Assignee set to *Haru lida*

- Target version changed from *0.6.4* to *0.6.5*

#3 - 10/21/2014 04:11 PM - André Bachmann

I want to add that the `{{show_vote(...)}}` macro is only working on wiki pages. If I create a vote like the following one on a new issue, the mentioned `show_vote` macro always shows 0:

```
{{vote(vote1, Yes)}}
{{vote(vote2, No)}}
{{vote(vote3, Don't know)}}
```

```
Option 1: {{show_vote(vote1)}}
```

```
Option 2: {{show_vote(vote2)}}
```

```
Option 3: {{show_vote(vote3)}}
```

However, if I'm about to add a new comment on an issue and use the `show_vote` macro and then preview my new comment, it seems to work! But as soon as I click OK, it only shows 0 on all vote options.

```
% ruby script/about
```

```
bash-4.1# ruby script/about
```

```
Environment:
```

```
Redmine version      2.3.1.stable
Ruby version         1.9.3 (x86_64-linux)
Rails version        3.2.13
Environment          production
Database adapter     Mysql2
```

```
Redmine plugins:
```

```
redmine_wiki_extensions 0.6.3
redmine_wiki_lists      0.0.3
```
