<b>Target version:</b>	<b>Spent time:</b> 0.00 hour
<b>Description</b> What we would like is to see the diffs between the current state of trunk and the current state of a branch, as in svn diff <a href="https://server.corp.com/svnrepos/code/v/trunkhttps://server.corp.com/svnrepos/code/v/branches/var-r1784">https://server.corp.com/svnrepos/code/v/trunkhttps://server.corp.com/svnrepos/code/v/branches/var-r1784</a>  Currently the diff can only be done within the branch.  Would this be hard to implement into redmine_code_review?	

### History

#### #1 - 11/16/2016 10:20 PM - Haru lida

This plugin only can add comments to diffs that was created by redmine itself.  
So, I can't implement your request.

Thanks.
