<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	
What steps will reproduce the problem?	
Install redmine_wiki_extention, go to some issue, press "Edit" and look at the "Notes".	
<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	
What is the expected output? What do you see instead?	
I expect to see the field "Notes" and buttons above it.	
But I see buttons to the left of "Notes" (see screenshot) and those buttons do not work (they are absolutely inactive).

History

#1 - 08/13/2017 02:06 AM - Vladimir Boytsov

The problem is resolved by editing redmine/public/stylesheets/jstoolbar.css

The added positions marked out by bold-italic font.

1.
.jstEditor {
padding-left: 0px;
padding-top: 30px;
}
2.
.jstEditor textarea, .jstEditor iframe {
margin: 0;
width: 99%;
}
3.
.jstElements {
padding: 3px 3px 3px 0;
position: absolute;
}

#2 - 08/13/2017 02:53 PM - Haru Iida

- Project changed from r-labs to Wiki Extensions

Thank you for your report.

But I couldn't reproduce the problem.

What browser do you use?

#3 - 08/13/2017 09:34 PM - Vladimir Boytsov

Hi, Haru!

Firefox 54.0 64bit. One more thing - I use VirtualBox 5.1.26 r117224 for my Debian and CentOS servers.
The same problem in Chromium 60.0.3112.78.

..... now I tested compatibility with other plugins and I've found the reason of uncompatibility - Redmine Mentions plugin.
