Is Wiki Extensions module enabled in your project settings page?

#2 - 03/09/2020 03:49 PM - Gavin Ong

I cannot enable the Wiki Extensions module enabled. Once the Wiki Extensions module enabled, wiki page and setting page will prompt internal error.

#3 - 03/09/2020 04:29 PM - Haru lida

lastupdate_at macro does not work if Wiki Extensions was not enabled.
Is there any error message in production.log when it was enabled?

#4 - 03/11/2020 01:14 PM - Gavin Ong

i will provide the log after i create a test project to test this.
